Registration is limited and only seminar attendees are eligible to receive discounts on select products and a complimentary lunch.

Mold Remediation Supervisor

Presented by Michael Pinto, *Wonder Makers Environmental*

RSVP BY
4/6/12

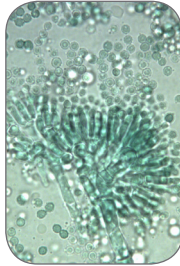

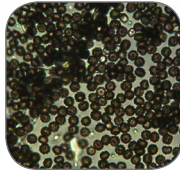

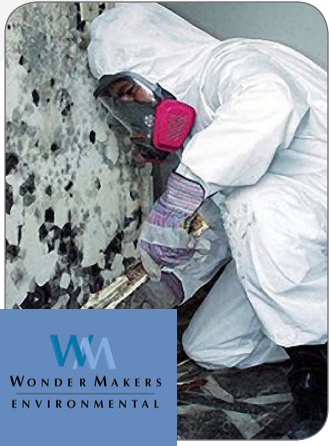

2-DAY COURSE DATES & TIME

April 17-18, 2012
 8:30am - 4:30pm

COURSE FEE

\$695 per person

*Please note that there is a 50% cancellation fee policy.
 Seating is limited.*

The second level of training is the two-day Mold Remediation Specialist (MRS) course. The MRT course or an equivalent from another training provider is a prerequisite. The focus of the Specialist class is on education rather than training because the project supervisor must have skills in choosing from a variety of techniques and requirements to best suit a particular project. The heaviest emphasis is on risk assessment, selection of containment and decontamination unit options, communication of information to technicians and clients, and a deeper understanding of the various standards of care in the industry. Wonder Makers Environmental is an approved training provider in the State of Florida.

This course will cover:

- Health Effects Related to Fungal Exposure
- Standards and Guidelines
- Risk Assessment in Fungal Contamination Projects
- Isolation/Containment of Remediation Activities
- Post-Remediation Activities
- Project Management Skills
- Liability and Insurance Considerations

Presented by Michael Pinto...

Michael Pinto, CSP, CMP is CEO of Wonder Makers Environmental. He focuses on common sense practices that work when restoration professionals are faced with fungal contamination. Mr. Pinto is the author 150+ published articles and several books including, *Fungal Contamination: A Comprehensive Guide for Remediation*. He completed doctoral course work in environmental engineering and holds numerous certifications in the environmental and safety areas including Certified Safety Professional and Certified Mold Professional. He was selected as part of the Mitigation Assessment Team for FEMA following Hurricanes Katrina and Rita and was a contributor to the EPA's Healthy Homes Initiative.
